

LED bulb BA15S 6 V DC orange, 30xSMD 2835

Reference: AM0764

EAN13: -

HS code: 85395200

Product attributes:

Product features:

Light color: Orange
Angle of light: 360°
Luminosity: 450-500 lm
Patience: BA15S
Current: 0.4 A
LED type: 2835 SMD
Voltage: 6 V DC
Number of LEDs: 30
Waterproof grade: IP22
Lifetime: 50,000 hours

Product description:

The LED bulb with BA15S base is intended as a replacement for a single filament bulb in a 6 V electrical system. The orange version is suitable for lighting functions requiring orange light, especially in vintage vehicles. The product requires connection to a system with a negative ground.

Technical specifications

- Base: BA15S
- Supply voltage: 6 V
- Light color: orange
- LED type: SMD 2835
- Number of LEDs: 30
- Design for single-strand base
- Vehicle polarity requirement: negative ground

Functions and features

- LED design designed to replace a classic bulb with a BA15S base.
- The design with multiple SMD LEDs spreads the light in multiple directions.
- Suitable for use in 6 V on-board systems.
- The orange color of the light corresponds to use for signaling or marker light functions, if this is appropriate for the specific vehicle and light.

Ideal for

- Historic vehicles with 6 V electrical system
- Vintage cars equipped with BA15S socket
- Replacement of single filament lamps in applications requiring orange light

Package contents

- 1 pc LED bulb BA15S

Why choose this product?

- It corresponds to the BA15S socket and the voltage is 6 V.
- It is intended for vehicles where it is necessary to maintain a negative battery.
- The LED design represents a direct alternative to a classic light bulb with the same base.
- A suitable solution for the renovation and operation of historic vehicles with a six-volt system.

Installation and operating instructions

- Before installation, verify the BA15S socket, operating voltage 6 V and the desired light color for the given lighting function.
- Designed for vehicles with a negative ground. If used in a system with reverse polarity, the bulb will not function

properly.

- Perform installation with the power off.
- Before use, verify compatibility with the light fixture and vehicle operating regulations.

Safety notice

- Incorrect polarity connection may result in product malfunction or damage.
- Use the product only in a 6 V electrical system.
- During installation, be careful not to short circuit the socket or the vehicle's electrical system.
- If you are not sure about compatibility with the vehicle's electrical installation, entrust the installation to a professional service.
