

# Power supply 24V, 3A - 72W

Reference: AM8076

EAN13: -

UPC: 85044090

## Product attributes:

## Product features:

Input voltage: 85-265V AC, 50/60 Hz

Output voltage: 24V DC

Output current: 3A

Output power: 72W

Waterproof grade: IP20

## Product description:

Switched industrial power supply intended for installation in distribution cabinets. This source is of industrial design, it is covered by a metal frame with IP20 protection, it has a standard terminal block with screws for connecting the input mains voltage including the ground wire and three pairs of output wires of direct current voltage. The source has short circuit protection, overvoltage protection and current overload protection. The industrial source is actively cooled. The power source includes an LED diode that serves as a power indicator and also an adjustment trimmer, thanks to which the output voltage of the power source can be adjusted.

Suitable, for example, for powering servo motors, home automation, entrance gates and other applications. Always count on a sufficient reserve in performance (20-25%), it is not advisable to operate the source for a long time at the limit of performance possibilities. You can find more industrial sources of other parameters in our offer.

Input voltage: 190-265 V AC, 50/60 Hz.

Output voltage: 24 V DC, max. 3A

Overload protection

Overvoltage protection

Short circuit protection

Steel construction

Certificates: CCC / FCC / CE, ROHS

Working temperature: -30~50°C

Ambient humidity: 0~95%

For internal use only

Size: 110x79x36mm
