

Electrical installation insulating tape 0.13x15mm, 10m

Reference: AM9169

EAN13: -

UPC: 39191080

Product attributes:

Color: White, Yellow, Red, Blue, Black, Grey, Brown, Greenish yellow

Product features:

Length: 10 m

Product description:

This insulating tape is ideal for a variety of applications such as insulating electrical wires, securing cables, minor repairs, decorative applications and many more. Available in a wide range of colors, our tape allows easy organization and coding of wires and cables, but also offers creative possibilities for decorative purposes. With excellent flexibility and adhesion, our tape is easy to apply and holds firmly, ensuring a stable and reliable insulation.

Application: Make sure the surface the tape will be applied to is clean and dry to ensure optimal adhesion. Use the required length of tape and apply with firm pressure to ensure even adhesion. For a longer lasting and stronger connection, leave the tape without load on the applied site for at least 24 hours.

Material: PVC

Working temperature: +10°C to +85°C

Electrical strength: 72.9kV/mm
