

# XT60 cable connector, male

Reference: AM3560

EAN13: -

UPC: 85369010

## Product attributes:

## Product features:

Color: Yellow

Conductor cross section: 2.5mm<sup>2</sup>

Connector: XT60

Number of pins: 2-pin

Type: Male

Construction: By soldering

Operating temperature: -20°C - +120°C

Max. current: 60A

## Product description:

The XT60 connector is a standard power connector designed for high currents. This connector has a specific connection where the minus is located on the beveled side and the plus is on the straight side. The connector pins are gold-plated, which ensures high-quality contact and low resistance.

XT60 connectors are often used in applications where a connection to the battery is needed, for example in model making or drones.

Depending on the application and the type of equipment, the current loads of the XT60 connector can be different, but in general it is able to withstand a constant current load and even double it for a short time.
