

Safety glasses, for red lasers, 600-1100nm

Reference: AM6026

EAN13: -

UPC: 90132000

Product attributes:

Product features:

Optical absorption: OD4

Product description:

A solution designed to protect you from the harmful effects of laser beams while increasing your visual comfort during work or leisure activities. These glasses are designed with the needs of people who are in environments where they are exposed to laser radiation, such as laboratories, industrial premises or even during laser shows.

The filters absorb and reflect dangerous wavelengths of laser radiation, protecting your eyes from damage and minimizing glare.

Blocked wavelength range 600-1100nm.

Features:

FROM: 4+

Light transmittance: 30%

Very high quality glasses

Comfortable frame design

Good shielding of the surrounding environment

Very durable material

The package includes one pair of glasses with a case.
