

Zinc battery, AGFAPHOTO 3R12, 4.5V

Product codes:

Reference: AM6750

EAN13: 4250175823362

UPC: 85078000

Product features:

Voltage: 4.5 V DC

IEC designation: 3R12

Product attributes:

Product description:

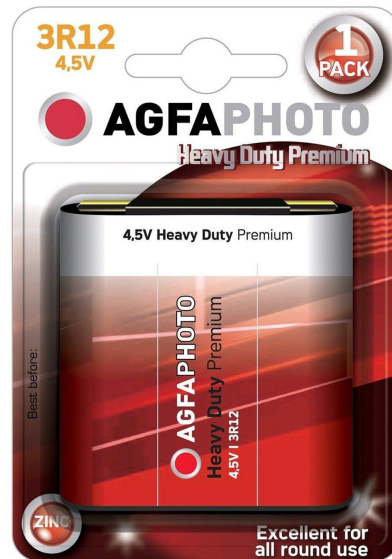

AgfaPhoto 4.5 V zinc-carbon battery

An economical and reliable power source for a wide range of low to medium power devices. With a voltage of 4.5 V, it is ideal for:

- Portable flashlights and emergency lights
- Older radios and weather stations
- Wireless sensors and alarms
- Various toys and retro devices

The durable construction prevents electrolyte leakage and protects your devices from damage. Thanks to the low self-discharge, you can store the battery for a long time and always have it ready for immediate use. Individual packaging of one piece allows you to buy exactly as much as you need - whether for the home, workshop or emergency supplies. A great choice if you are looking for an affordable and versatile power supply for everyday and occasional use.

Number of pieces in the package: 1

Special technology guarantees protection against battery leakage

Marking: 3R12, 4.5V
