

Drywall anchor, 14x42mm

Product codes:

Reference: AM5200

EAN13: -

UPC: 39259010

Product features:

Product attributes:

Product description:

Grooved plastic expansion pipe plugs provide a firm and secure anchorage for self-tapping screws in drywall or other building materials. Thanks to the flexible construction with an expanding effect when screwed in, the plug is firmly anchored and eliminates the risk of the joint loosening.

Technical specifications

- Dimensions: 14 × 42 mm
- Fastening type: self-tapping
- Material: plastic
- Color: according to production series (typically gray or white)
- Screw head: male (flat head), pozidrive compatible
- Use: expansion function for maximum grip
- The plugs are not chemically active, halogen-free

Functions and features

- Grooved body ensures stable expansion during installation
- Suitable for concrete, brick, blocks, plasterboard
- Easy application without the need for special tools
- Resistant to moisture, vibration and light loads
- Ideal for mounting in walls, ceilings, cabinets and enclosures

Ideal for

- Fixing LED surface-mounted luminaires, electrical terminals and connectors
-

- Installation of rails, brackets, junction boxes
- Small domestic and industrial installations
- Working with drywall
