

BAX9S, LED 5x 5050 SMD - Warm white

Product codes:

Reference: AM0167

EAN13: -

UPC: 85395200

Product features:

Light color: Warm white

Angle of light: 360°

Patience: BAX9S

LED type: 5050 SMD

Number of LEDs: 5

Waterproof grade: IP22

Lifetime: 50,000 hours

Product attributes:

Tension: 6 V DC, 12 V DC

Product description:

The LED bulb with BAX9S base is designed to replace compatible bulbs in applications with the same base and corresponding supply voltage. The product is available in 6 V and 12 V variants, emits warm white light and uses 5 5050 SMD LED chips. The design with light points around the perimeter supports wide light dispersion.

Technical specifications

- Socket: BAX9S
 - Light color: warm white
 - Power supply options: 6 V DC, 12 V DC
 - LED type: 5050 SMD
 - Number of LEDs: 5
 - Beam angle: 360°
 - Protection: IP22
 - Lifespan: 50,000 hours
-

Functions and features

- LED design designed for BAX9S socket.
- Equipped with 5 SMD LED elements.
- The light points are located on the sides and on the front of the bulb.
- The wide 360° beam angle promotes a more even distribution of light in the lighting space.
- Warm white light color is suitable where a less cold light effect is required.
- Availability in two voltage options allows selection according to the specific electrical system.

Ideal for

- Replacement for bulbs with BAX9S base in devices with 6 V DC or 12 V DC power supply.
- Control, signaling and auxiliary lighting, where the BAX9S base is used.
- Applications requiring warm white light and wide light distribution.

Package contents

- 1 pc. BAX9S LED bulb in the selected voltage variant

Why choose this product?

- Clearly designated BAX9S socket.
- Choice between 6 V and 12 V depending on the specific power supply.
- Equipped with 5 LED chips 5050 SMD.
- Warm white light color.
- Wide 360° lighting angle.

Installation and operating instructions

- Before installation, verify the correct BAX9S socket type and the corresponding voltage variant of the product.
- Install the 6 V variant only in 6 V DC circuits and the 12 V variant only in 12 V DC circuits.
- Turn off the power when installing.
- Insert the bulb without using excessive force to avoid damaging the socket or the fixture.

Safety notice

- Incorrect selection of voltage may lead to damage to the bulb or electrical circuit.
 - Install the product only in devices designed for the BAX9S socket.
 - Protect the product from moisture and direct contact with water,
-

IP22 protection does not provide protection against immersion or strong water jets.

- Do not use the product if the contacts or bulb body are damaged.
