Product features:

Product description:

Copper heat sink 10x14x5mm with thermally conductive adhesive tape

Universal copper heat sink designed for efficient heat dissipation from electronic components and chips. Thanks to its compact dimensions and thermally conductive adhesive tape on the bottom, installation is quick and easy without the need for additional fasteners.

Technical specifications

- Material: copper with anti-oxidation coating
- Dimensions: 10 × 14 × 5 mm
- Color: natural copper
- Surface treatment: anti-oxidation layer
- Fixing: bottom side with heat-conductive adhesive tape
- Weight: approx. 3 g

Functions and features

- High thermal conductivity and efficient cooling
- Compact dimensions suitable for small electronic components
- Easy installation thanks to self-adhesive thermal tape
- Long life and oxidation resistance

Ideal for

- Cooling of processors, memory chips and transistors
- Integrated circuits and power modules
- DIY projects and electronic devices with limited space
- IoT devices, mini PCs, laptops

Package contents

- 1× copper heatsink 10x14x5mm with thermally conductive adhesive tape

Why choose this product?

- Efficient cooling in a compact design
 - Easy installation without the need for screws or adhesives
 - Universal use for various electronic applications
 - High-quality material with a long service life
-
