BAU15S, 39 SMD 3030 LED, 12V - Yellow

Reference: AM6630
EAN13: -
HS code: 85395200

Product attributes:

Product features:

Light color: Yellow
Angle of light: 360°
Luminosity: 1200 lm
Patience: BAU15S
Voltage: 12-24 V DC
Number of LEDs: 39
CANBUS Chip: YES
Performance: 10 W
Lifetime: 30,000 hours

Product description:

The high-performance BAU15S LED bulb with 39 3030 chips provides intense and bright yellow light. Thanks to the wide voltage range of 12-50V, it is suitable for cars, trucks, motorcycles and other vehicles. It is an ideal replacement for classic car bulbs, offering lower energy consumption and a longer lifespan.

Technical specifications

- Socket: BAU15S
- LED type: 39× SMD 3030
- Light color: Yellow
- Operating voltage: 12–50V DC
- Power consumption: 10W (12V)
- Dimensions: 52 x 20 mm
- Cooling: Aluminum shell with high thermal conductivity
- Lifespan: up to 30,000 hours

Functions and features

- High brightness thanks to modern 3030 chips
- Wide lighting angle for maximum visibility
- Shock and vibration resistance
- Fast response – reaches full brightness instantly
- Compatible with most vehicles within the 12-50V range
- Economical operation with low energy consumption

Ideal for

- Direction indicators (blinkers)
- Warning lights
- Vans, trucks, motorcycles and cars

Package contents

- 1× LED bulb BAU15S 39×SMD 3030, yellow

Why choose this product?

- Modern LED technology for maximum efficiency
- Significantly higher luminosity compared to conventional light bulbs
- Long life and reliable operation
- Universal power supply range 12–50V
- Easy installation without the need for modifications
