

Connector for switches with mounting diameter 16/19mm, 15A

Product codes:

Reference: AM7933

EAN13: -

UPC: 85366990

Product features:

Current: 15 A

Waterproof grade: IP20

Product attributes:

Product description:

This robust connector is designed for reliable connection of switches with a mounting diameter of 16 mm or 19 mm. Thanks to high-quality wires and a solid plastic body, it facilitates installation, increases connection safety and eliminates the risk of contact loosening during vibrations or frequent use.

Technical specifications

- Rated current: 15 A
- Voltage: up to 250 V AC
- Conductor type: tinned copper conductors
- Wire length: 15 cm
- Number of pins: 4 pins (depending on switch variant)
- Connector material: durable thermoplastic
- Mounting compatibility: 16mm and 19mm switches
- Temperature resistance: -20 °C to +85 °C
- Weight: 20g
- Protection: IP20 (depending on the type of use - recommended to install in a protected area)
- Connector body dimensions: 20 × 20 × 25 mm

Functions and features

- Quick and safe connection of buttons, switches and toggle switches.
-

- Firmly secure the pins against loosening.
- Highly resistant conductors suitable for higher current loads.
- Universal use in automotive, industrial and hobby projects.

Ideal for

- Illuminated and non-illuminated buttons, 16 mm and 19 mm.
- Car and motorcycle electrical installation.
- Control panels, switchboards, DIY electronics.
- Wherever a solid and clean connection is needed.

Package contents

- 1x connector with wires for 16/19 mm switches

Why choose this product?

- It will simplify wiring and increase reliability.
- Durable material and wires for long life.
- Universal compatibility with most common switches.
- Also suitable for higher current loads up to 15 A.

Warning: This connector is designed exclusively for loads up to a **maximum of 15 A**. Do not exceed this value to avoid overheating or damage.
