

Stereo jack 3.5 mm, plastic panel connector

Reference: AM3156

EAN13: -

HS code: 85369010

Product attributes:

Product features:

Connector: Jack 3.5 mm

Max. current: 1 A

Product description:

3.5mm Stereo Audio Jack socket - panel mounting, 3 poles

Reliable 3.5mm stereo audio socket designed for panel mounting. Ideal for connecting headphones, audio modules, amplifiers, DIY projects and any device where a solid and high-quality audio connector is needed.

Technical specifications

- Connector type: 3.5mm stereo (TRS), female
- Number of contacts: 3
- Max current: 1 A
- Body material: plastic
- Contact surface: gold over nickel (better conductivity and protection against oxidation)
- Mounting: panel mount with nut
- Pin type: solder pins
- Dimensions: 21 × 10 mm
- Weight: 3 g
- Mounting hole: 6 mm - suitable for most panels and project boxes
- Protection: IP20 (suitable for indoor use)

Functions and features

- Stable stereo sound transmission without interference
- Durable gold-plated contacts for long life
- Easy assembly thanks to thread and included nut
- Universal compatibility with standard 3.5mm connectors
- Suitable for soldering in DIY and professional projects

Ideal for

- Headphone outputs and audio inputs
- DIY electronics and Arduino/Raspberry Pi projects
- Audio equipment repairs
- Audio panels, amplifiers, players, mixing consoles

Package contents

- 1× 3.5mm stereo socket (panel mount)

Why choose this product?

- High-quality and proven connector type PJ-392A
 - Durable materials and long service life
 - Clear and stable audio signal thanks to gold contacts
 - Suitable for professional and hobby use
