

# Digital panel thermometer 50-380V, mounting hole 22mm

## Product codes:

Reference: AM8558

EAN13: -

UPC: 90251920

## Product features:

Mounting hole: 22 mm

Power supply: 50-380 V

Temperature range: 20°C - +119 °C

Accuracy:  $\pm 0,5$  °C

## Product attributes:

Backlight color: Red, Green, White

## Product description:

This compact 22mm diameter LED panel thermometer is ideal for quickly and clearly displaying temperatures from 20-119°C directly on the control panel. It uses a built-in sensor and is powered by a wide range of AC 50-380V, allowing it to be used in industrial, laboratory and domestic applications.

## Technical specifications

- Power supply: AC 50-380V
  - Measuring range: 20-119 °C
  - Accuracy:  $\pm 5\%$
  - Mounting hole diameter: 22 mm
  - Display type: LED, digital
  - Display design: red / green / white variant (depending on variant)
  - Operating temperature: -20 to 55°C
  - Body material: plastic + polycarbonate
  - Weight: 28g
  - Protection: IP40 (front panel)
  - Temperature sensor cable length: 90 mm
-

- Installation: screw fixing
- Product dimensions: D30x60mm

### Functions and features

- Clearly readable LED display for immediate display of the current temperature.
- Low energy consumption and long life of the LED module.
- Durable construction with dustproof back cover.
- Built-in temperature sensor with fast response.
- Wide power supply range for use in various systems.
- Easy to install in a standard 22mm hole.

### Ideal for

- Industrial control panels
- Switchboards and electrical installations
- Temperature monitoring of machines and equipment
- Laboratory and measurement applications
- DIY projects and home automation

### Package contents

- 1× LED digital panel thermometer (selected variant: red / green / white)
- Integrated temperature sensor

### Why choose this product?

- Fast, clear and clear temperature display thanks to the LED display.
- Reliable operation over a wide AC voltage range without the need for an external power source.
- Compact design suitable for most panel installations.
- Highly versatile use due to wide temperature range.
- Available color variants for better visual system differentiation.
