

Grill motor up to 15kg, 2.5rpm/m

Reference: AM5113

EAN13: -

HS code: 85044090

Product attributes:

Product features:

Voltage: 3 V DC

Waterproof grade: IP20

Product description:

The battery BBQ motor is designed for smooth and even rotation of the grill spit when preparing meat on the grill, when baking or BBQing. Powered by regular batteries, it is ideal for outdoor use, camping and home grills without access to the mains. The robust construction and gear mechanism ensure reliable operation even under heavy loads.

Technical specifications

- Supply voltage: 3 V DC
- Power supply: 2 x D batteries (LR20) 1.5 V
- Possibility to connect to a 3V, min 0.5A, 5.5x2.1mm socket power supply
- Current consumption: 0.3 A
- Maximum rotisserie load: 15 kg
- Body material: steel with black powder coating
- Output shaft material: metal
- Degree of protection: IP20
- Motor dimensions: 95 x 80 x 65 mm
- Weight: 800g

Functions and features

- Battery operation without the need for mains power
- Slow and even rotation ideal for BBQ
- Stable operation even with uneven rotisserie load
- Integrated ON/OFF rocker switch
- Easy to install on most common grills
- Compact dimensions and easy handling

Ideal for

- Grilling chicken, roulades and legs
- BBQ spits and rotating grilling systems
- Garden and portable grills
- Camping and outdoor cooking

Package contents

- 1x battery-powered grill motor
- batteries are not included

Why choose this product?

- Independence from the power grid thanks to battery power
 - Optimal rotation speed for even cooking of meat
 - Durable metal construction suitable for outdoor use
 - Easy to use and reliable operation
