

Duct Tape textile tape 0.27mm, waterproof, up to 120 °C

Reference: AM9289
EAN13: -
HS code: 39191080

Product attributes:

Color: Black
Length: 30 m, 50 m

Product features:

Length: 5 m
Width: 50 mm
Color: Silver

Product description:

Textile adhesive tape with a fabric and polyethylene backing and a pressure-sensitive rubber adhesive is intended for bundling cables, temporary fixation, sealing and general assembly work indoors and outdoors. Thanks to its flexible structure, it easily adapts to uneven surfaces and is also suitable for applications where water resistance and moisture resistance are required.

Technical specifications

- Type: textile tape (carpet/duct/gaffer), single-sided adhesive
- Material: polyethylene + fabric (gauze), surface with hotmelt layer
- Adhesive: rubber, pressure sensitive
- Thickness: 0.27mm
- Adhesion: ≥ 0.36 kN/m
- Initial tack: $\geq 10\#$
- Holding power: ≥ 60 min
- Tensile strength: ≥ 2.5 kN/m
- Heat resistance: 120 °C
- Length: 30 m or 50 m option
- Color options: black, red, silver, yellow, brown, blue, green, pink, gray, white (some colors must be requested)

Functions and features

- Waterproof and moisture-resistant design for use in more demanding conditions
- Good flexibility and surface adaptation, also suitable for uneven substrates
- Suitable for bundling and fixing cable bundles
- Possibility of tearing off by hand (typical for textile tapes)
- Residue-free removal depends on surface type, application time and environmental conditions
- Surface warning: depending on the underlying materials, it may not be suitable for some varnished/painted surfaces

Ideal for

- Bundling and organizing cabling in installations and distribution boards
- Temporary fixation and assembly work during service interventions
- Sealing and repairs (e.g. pipes, hoses) as part of routine maintenance
- Marking and color differentiation of lines and bundles (according to the selected color)
- Installation and fixation of equipment where gaffer tape is required

Package contents

- 1x roll of textile adhesive tape in the selected color and length

Why choose this product?

- Combination of textile backing and pressure-sensitive rubber adhesive for universal use
- Good adhesion and mechanical resistance for fixation and bundling
- Waterproof design suitable for both interior and exterior use
- Multiple color options available for technical marking and organization

Installation and operating instructions

- Clean and degrease the surface before application to improve adhesion.
-

- Apply the tape with adequate pressure over the entire bonding area.
- When removing, proceed smoothly and at a low angle; for sensitive surfaces, we recommend testing compatibility on a small area
- Removability and residual tack may change depending on time, temperature and substrate type.
