

# Car charger USB-C + USB-A, 3.1 A (12 W), 12-24 V

Reference: AM6370  
EAN13: -  
HS code: 85369010

## Product attributes:

Color: Black, Silver

## Product features:

Voltage: 12-24 V DC  
Output current: 3.1 A  
Output power: 12 W

## Product description:

Compact car charger for the cigarette lighter socket for powering and charging mobile devices while driving. It offers a combination of USB-C and USB-A connectors, is suitable for use in vehicles with a 12 V and 24 V power system, and thanks to its metal-plastic body, is designed for normal operating loads in a car.

## Technical specifications

- Input voltage: DC 12-24V
- Output connectors: 1x USB-C, 1x USB-A
- Maximum output current: 3.1 A
- Maximum output power: 12 W
- Body material: ABS + metal
- Color: black or silver color

## Functions and features

- Possibility of connecting two devices simultaneously (USB-C + USB-A)
- Stable charging when operating in a vehicle
- Integrated protections: overcurrent, overvoltage, undervoltage, overload, overheating, short circuit
- Compact design suitable for permanent storage in a drawer

## Ideal for

- Charging your phone in the vehicle
- GPS navigation power supply
- Power supply for dash cam (dash camera)
- Charging small electronics via USB

## Package contents

- USB-C + USB-A car charger

## Why choose this product?

- Combination of USB-C and USB-A for compatibility with common cables and devices
- Supports 12-24V power supply for both passenger and commercial vehicles
- Protective functions for stable operation and reducing the risk of damage to connected devices
- Durable ABS and metal body

## Installation and operating instructions

- Plug the charger into the cigarette lighter socket (DC 12-24 V) and connect the device with a suitable USB cable.
- When charging two devices simultaneously, the available current can be divided between the outputs according to the consumption of the connected devices.
- Ensure sufficient ventilation around the charger and do not cover it.

## Safety notice

- Designed exclusively for use in a 12-24V DC automotive socket. Do not connect to other power systems.
  - Do not use if there is mechanical damage, dirty connectors or signs of overheating.
  - Protect from water and high humidity.
