

USB-C/USB 65W charger (2× USB-C + 3× USB-A), PD 3.0 / QC 3.0, white/black

Product codes:

Reference: AM5972

EAN13: -

UPC: 85044090

Product features:

Input voltage: 100-240 V AC, 50/60 Hz

Performance: 65 W

Product attributes:

Color: White, Black

Product description:

The compact mains charger with an EU plug is designed to charge multiple devices simultaneously via USB-C and USB-A. It supports fast charging using USB Power Delivery and Quick Charge protocols, and is suitable for phones, tablets and other USB-powered devices at home, in the office and on the go.

Technical specifications

- Type: USB mains charger (AC/DC adapter)
- Total output power: 65W (max.)
- Input: AC 100-240V, 50-60Hz
- Ports: 2× USB-C, 3× USB-A
- Protocol support: USB Power Delivery (PD 3.0), Quick Charge (QC 3.0)
- Output profiles (depending on port and protocol): 5 V / 9 V / 15 V / 20 V
- Material: ABS + PC (flameproof)
- Color options: white, black
- Plug type: EU

Functions and features

- Possibility of charging up to 5 devices simultaneously
- Fast charging via USB-C (PD) and USB-A (QC) depending on the compatibility of the connected device
- Integrated protections: against short circuit, overvoltage, overcurrent, overheating and overcharging
- Compact design suitable for installation in a standard power outlet

Ideal for

- Charging mobile phones and tablets via USB-C/USB-A
- Powering accessories (headphones, power banks, players, smart watches)
- Work desk and home charging point with multiple devices
- Travel use thanks to wide input voltage range of 100-240 V

Package contents

- 1× AC charger (EU plug)

Why choose this product?

- Combination of USB-C and USB-A ports for broad compatibility
- Support PD 3.0 and QC 3.0 for fast charging of compatible devices
- Protective features for safer operation during long-term charging
- Available color options: white and black

Installation and operating instructions

- Plug the charger directly into a power outlet with the appropriate voltage within the range of 100-240 V AC.
- For fast charging, use quality cables and devices that support PD or QC.
- When charging multiple devices simultaneously, the available power is divided between the active ports according to the requirements of the connected devices.

Safety notice

- The device is powered by a 100-240 V AC mains supply. Be careful when handling and use only undamaged cables.
- Do not use in environments with high humidity and do not tamper with the charger's construction.
- Ensure sufficient cooling, do not cover the charger during operation.
