 - Type: magnetic wireless car charger, adjustable holder
 - Maximum output power: 15 W
 - Input: 5V/2A, 9V/2A
 - Output modes: 9V/1.67A, 5V/3A, 12V/1.25A
 - Power/communication interface: USB-C (Type-C)
 - Installation: mounting in the ventilation outlet
 - Material: ABS
 - Color: black
 - Dimensions: 64 × 32 mm
 - Product weight: 48g
 - Compatibility: devices supporting wireless charging according to the
-

Wireless standard

Functions and features

- Magnetic phone holder for a stable hold while driving
- Wireless charging with up to 15W (depending on phone and power adapter compatibility)
- RGB ambient lighting for better visibility in the dark
- Adjustable holder angle, can be rotated for horizontal and vertical orientation
- Compact design designed not to block airflow from ventilation
- Mounting suitable for common slatted ventilation outlets

Ideal for

- Charging your phone in the car while navigating
- Fixing your phone on the dashboard without using suction cups
- Drivers who want to quickly put on and take off their phone with one hand
- Vehicles with classic louvered ventilation outlets

Package contents

- Wireless charger/car holder
- USB-C cable
- Instructions for use

Why choose this product?

- Combines holder and wireless charging in one device
- Magnetic mount simplifies handling and increases phone stability
- USB-C power delivery and support for multiple input/output modes
- Installation in the ventilation without interfering with the vehicle interior

Installation and operating instructions

- Fasten the bracket to the ventilation grille slats and check for firm seating.
 - Connect power via USB-C and use a suitable car adapter with adequate power.
 - To achieve higher charging performance, it is necessary that both the phone and the power adapter support the appropriate mode.
 - Verify compatibility with ventilation type; circular and atypical exhalations may not be appropriate.
