

USB charging cable for Huawei Watch Fit Mini, Watch Fit and Band 7/8

Product codes:

Reference: AM0454

EAN13: -

UPC: 85444220

Product features:

Length: 100 cm

Input voltage: 5 V DC

Output current: 700 mA

Color: Black

Connector: USB typ A

Product attributes:

Product description:

The USB magnetic charging cable is designed for charging selected Huawei smartwatches and bracelets with a two-pin magnetic connector. It is suitable as a replacement or additional cable for home and work use. The cable uses a USB input and a magnetic charging head for easy connection to the device. The cable length of 100 cm ensures practical use when charging from a USB adapter, computer or power bank.

Technical specifications

- Product type: charging cable
 - Input connector: USB-A
 - Charging connector: magnetic two-pin connector
 - Input voltage: 5V DC
 - Output voltage: 5V DC
 - Output current: 700 mA
 - Cable length: 100 cm
 - Material: plastic
 - Color: black
 - Compatibility: Huawei Watch Fit Mini
-

- Other listed compatibility: Huawei Watch Fit, Huawei Band 7, Huawei Band 8

Functions and features

- The magnetic attachment of the connector makes it easy to seat correctly when charging.
- Designed for power supply from a regular 5V USB port.
- The cable is suitable as a replacement charging accessory for compatible devices.
- According to the available description, it includes short circuit protection and overvoltage and overload filtering.
- The compact design allows for easy carrying and everyday use.
- The low-profile cable design supports easy storage without significant kinking.

Ideal for

- Charging the Huawei Watch Fit Mini smartwatch.
- Charging selected Huawei Watch Fit and Huawei Band devices with the corresponding magnetic two-pin interface.
- Use at home, in the office and on the go.
- As a replacement cable if the original charging accessory is lost or worn out.

Package contents

- 1x USB magnetic charging cable

Why choose this product?

- A simple and clear solution for charging compatible Huawei devices.
- The length of 100 cm provides sufficient reach for normal use.
- Power supply from the 5V USB interface allows for a wide range of connection options.
- The magnetic connector reduces the need to mechanically insert the connector into the device.
- Suitable as an operational replacement or a second cable for another workplace.

Installation and operating instructions

- Before connecting, verify that the charging contacts and connector shape match your device.
 - Only connect to USB power with 5V DC output.
 - Keep the charging surfaces of the device and the connector clean and dry.
 - If the magnetic connector does not fit properly, do not use the cable.
-

- For long-term reliability, we recommend not exposing the cable to excessive tension and sharp bending at the outlet.
