

# Replacement Filter Set for YL-H502 Water Filter

## Product codes:

Reference: AM0775

EAN13: -

UPC: 8414900090

## Product features:

## Product attributes:

## Product description:

This replacement filter cartridge set is designed for replacing the filtration stages in the YL-H502 water filter. It serves to restore mechanical filtration, carbon cartridge adsorption, the softening stage, and ultrafiltration in the tap water treatment system for direct drinking.

## Technical Specifications

- Product type: Replacement water filter set.
- Intended for: YL-H502 water filter.
- Number of filter cartridges in the set: 5 pcs.
- Filtration setup: 4+1 ultrafiltration system.
- Filtration stages: PP cotton filter, compressed activated carbon filter, softening resin, ultrafiltration membrane, post-activated carbon filter.
- Operation: Physical filtration without electrical power.
- Application: Tap water treatment.

## Features and Properties

- The PP cotton filter captures mechanical particles such as rust, sediments, sludge, and undissolved impurities.
  - The activated carbon filter is used for the adsorption of selected substances affecting the taste and odor of the water.
  - The softening resin is included as a filtration stage to adjust water hardness.
  - The ultrafiltration membrane forms a fine filtration stage to capture
-

fine impurities in the water.

- The post-activated carbon filter serves as the final stage to improve water taste.
- The set allows for the replacement of all five filtration stages in the compatible device.

#### **Ideal For**

- Regular maintenance of the YL-H502 water filter.
- Restoring filter cartridges in a home tap water treatment system.
- Use in kitchen filtration systems for direct drinking water.
- Replacing clogged or worn-out filtration stages.

#### **Package Contents**

- 1 pc PP cotton filter.
- 1 pc compressed activated carbon filter.
- 1 pc softening resin filter.
- 1 pc ultrafiltration membrane.
- 1 pc post-activated carbon filter.

#### **Why Choose This Product**

- The set includes all five filter cartridges needed to restore the filtration setup.
- The individual cartridges cover mechanical filtration, carbon adsorption, a softening stage, and ultrafiltration.
- The filters are designed for the specific YL-H502 filtration system, reducing the risk of using an incompatible cartridge type.
- Replacing the filter cartridges helps maintain the flow rate and functionality of the filtration system.

#### **Installation and Operating Instructions**

- Close the water supply to the filtration device before replacing the filters.
- Install the filter cartridges in the correct order according to the filtration stage markings on the device.
- After replacement, check the joints for leaks and verify the water flow.
- Do not drink the first water after replacing the filters; let the system flush out.
- Use the filters only with cold tap water.

#### **Safety Warnings**

- Do not use with water of unknown microbiological quality without prior disinfection or other adequate treatment.
-

- Do not use with hot water, chemically polluted water, or liquids other than water.
- Do not continue to use the filter in case of leaks, a cracked cartridge, or visible damage.
- Incorrect installation of the filter cartridges may cause water leaks or reduced filtration efficiency.
